Parthiv Patel

About Me

Hello World,

I am Parthiv Patel (The guy in above image). Currently I am Working in Tata Consultancy Services as an Associate System Engineer. I have completed Computer Science and Engineering degree from Gujarat Technological University. I am from Surat, Gujarat.

I am just another geeky nerd who likes to code (please don't ask me about DSA 🙂), design and develop websites and who always talk about technical stuffs (like how android is better than iOS (ps. Actually I don't have money to buy iPhone) or if Elon Musk is an alien emperor or not and many more silly but interesting things). So, that's pretty much about me.
